SIERRA SERVICE PROJECT
LOS ANGELES, CA — APRIL 2013

From April 11—15, fourteen adult volunteers travelled to Los Angeles, CA. They built a wall and replaced windows in the Rakestraw Community Center (where they also slept), cleaned the windows of the Wesley United Methodist Church, and built and installed bookshelves at the All Peoples Community Center in Compton.

After arriving Thursday evening, the group took an educational tour of Los Angeles. They learned a lot about the history of Los Angeles, visited some important historical and cultural places, toured and ate lunch at an organization called Homeboy Industries, and ate some good food!

The group built, installed, sanded and painted bookshelves in the All Peoples Community Center.

The group completed some repair work at the Rakestraw Community Center: building new frames for upstairs windows and installing the new windows (pictured above); repairing some floorboards (pictured left); and building and painting a wall to cover exposed plumbing (pictured below).
